Logomark

The Logomark is the face of EdMeca - the primary visual expression that we use to identify ourselves. This means that we need to be careful to use it correctly and to do so with care and consideration.

Clear space

Clear space prevents type, imagery or other graphic elements from interfering with the legibility of our logo. No graphic elements should encroach the border around the logomark. This space is determined by 50% height of logo on each side. Measure the clear space for primary logomark by the width of the letter “D” creative shape

Product logomark

Logo variation

EdMeca logo used on an application will often depend on the background and production method. When using the logo on a specific colour background consider the visibility and location of the logo to ensure maximum impact

Please note that RGB & Hex/HTML values will differ between the PANTONE Color Finder and the PANTONE Color Bridge Guides due to different standards for print and digital use. For the PANTONE Color Bridge Guides we use the M1 lighting standard to align with industry standards for process printing. For the PANTONE Color Finder we use the M2 lighting standard to align with commonly used design software like Adobe Photoshop.
